Stratton Street

Corporate Snapshot: Stratton Street Capital LLP

Stratton Street Capital is a London based fund management and advisory company founded in August 2000, specialising in fixed income markets. Rather than divide the world between developed and emerging markets, Stratton Street believe that it makes more sense to separate creditors from debtors. The partnership's activities are split into three areas of investment focus, of which the largest is international bond and currency investment.

Under Andy Seaman and Mark Johns, who are both partners in the LLP, this area has grown dramatically since 2008. Based on a well-developed investment process which they formed in the late 1990s before joining MSG & Partners in 2001, it was further refined as the Asian Bond & Currency Fund, which returned 59 per cent in 2008 as credit spreads widened.

At the end of March, the fixed income group managed and advised on USD1.065bn of fixed-income portfolios managed on those investment principles, including USD714m under advice in the New Capital Wealthy Nations Bond Fund and USD125m in the Renminbi Bond Fund.

The Stratton Street Daily

Stratton Street Capital's partnership with MLC

Stratton Street Capital chose MLC to partner with them to complete the translation of their 'The Daily Updates'.Translating the daily updates, has allowed Stratton to increase engagement with investors and keep their existing investors updated with relevant daily economy updates, keeping them informed daily on Asia's economy and performance.

> My Language Connection are a friendly service – they point out any text within our dailies that could be changed to read better before they begin translation. The speed of the sales team is always excellent, and the quality of the translations delivered to us is always excellent too. We would recommend My Language Connection.
